EDUCATION

University of Greenwich

London, UK

BSc (Hons) Computer Science, final year. Second-year average: 63% (2:1)

Sep 2024 – Jun 2027 (expected)

- **Second-year highlights:** Statistical Techniques with R (76%), Operating Systems (75%), Advanced Programming (68%), Computational Methods and Numerical Techniques (65%)
- **Final-year modules:** Machine Learning, Application of AI, Natural Computing, JVM Languages

West Thames College

London, UK

National Diploma in Computing

Sep 2020 – Jul 2022

PROJECTS

ASL Sign Recognition | PyTorch, OpenCV

Written by hand

- Wrote and trained a convolutional neural network to recognise American Sign Language hand signs from a labelled image dataset, with a script to retrain the model from scratch
- Built the pipeline to clean and split the image data, plus an OpenCV script that runs recognition on new input

LSTM Stock Forecast | Python, Keras, NumPy, yfinance

Group coursework

- Trained an LSTM on a 60-day lookback window of Apple share prices to predict the next five closing prices in a single output, as a group project adapted from published examples

IDEA 49: Commodities Signal Engine | Python, R, yfinance, Sentiment Analysis

AI-assisted

- Designed a signal engine for gold, oil and silver that trains a separate quantitative model per asset on a two-year window of price data
- Added a news engine that turns live headlines into per-asset sentiment with a confidence score, blended with the quantitative signal at a deliberately cautious 5% weight

Asteroid Diameter Regression | R

Written by hand

- Built regression models on near-Earth object data to estimate asteroid diameter as a planetary-defence risk indicator, using feature selection and residual diagnostics to judge model quality

Content Creation Pipeline | Node.js, Python, ffmpeg, ElevenLabs, Kling

AI-assisted

- Designed an end-to-end video pipeline that generates frames, animates them, adds narration, detects beats, burns in word-level captions and assembles the final cut
- Produced five finished short-form stories and wrote the brand strategy that made TikTok the primary channel

22 more projects, with code and write-ups, at koro119.github.io/portfolio-site

EXPERIENCE

Barista

Jun 2026 – Present

Redemption Roasters

London, UK

- Prepare speciality coffee and serve customers in a busy café, working alongside full-time final-year study

Supervisor

May 2023 – Dec 2025

Farmer J

London, UK

- Promoted from Barista to Supervisor within six months; led teams of 8+ across opening and lunch shifts
- Ran daily briefings, staff training, food prep and inventory while maintaining 95% staff retention

Bartender

Nov 2022 – Apr 2023

Oasis Lounge by Melaya

Leicester, UK

- Managed bar operations independently and grew event attendance by 15% through social media content

Barista

Jan 2022 – Aug 2022

The Real Eating Company

London, UK

- Trained staff across three locations, ran store opening and closing, and cut inventory discrepancies by 10%

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, R; working knowledge of Rust

Machine Learning: PyTorch, Keras, XGBoost, OpenCV, MediaPipe, retrieval-augmented generation, local LLMs (Ollama)

Databases: SQLite, Qdrant

Tools: Git, Linux, pytest, JUnit, Maven, React, AI-assisted development (Claude Code)

Spoken Languages: English, Hindi and Tamil (fluent); Japanese (basic)
